PREMIA[™]
end-to-end Insurance Solution

Empowering Business Transformation.

Insurance Management Software & Solutions

Empowering 115+ customers over 100 Insurance companies to deliver best in class solutions across General, Life, Health & Takaful Insurance

3i Infotech offers insurance organizations an array of powerful solution accelerators and software that enable efficient end-to-end management of insurance business processes. With cutting-edge automation capabilities and quick-to-deploy solutions, our offerings help companies eliminate operational inefficiencies and speed time-to-market across the entire portfolio of investment products (Life, General and Islamic insurance).

Our Value Propositions:

- End-to-End Insurance Solution partner with strong domain expertise in Life and General Insurance
- Enable distribution force to increase business by leveraging technology
- Flexible product configurator enabling business to launch new products with faster go-to-market
- Drive new business acquisition through digital eco system
- Improve operational efficiency through automated processes across customer service, claims and renewal business

PREMIA General Insurance

End-to-end core insurance solution that optimizes business processes and customer service across claims, underwriting, reinsurance, billing, finance, and distribution.

PREMIA Life Insurance

Innovative life insurance solution that cuts costs and time-to-market via automated underwriting, claims processing, report generation, reinsurance, and financial processes.

PREMIA Takaful

End-to-end Islamic insurance solution that spans all operations and supports both Mudharabah and Wakalah models across family, general, group, and annuity.

PREMIA Health

PREMIA Health provides insurers the capability to quickly launch new products across multiple product lines, and efficiently sell and support them through an array of distribution channels.
