

## Organized inventory control processes and centralized bill of materials mechanism for a leading manufacturer in UAE with ORION ERP solutions

Sector :  
**Manufacturing**

Company :  
**Anchor Allied Factory LLC**

Regional presence:  
**UAE**

### Company Snapshot

Anchor Allied is one of the largest manufacturers of Spray Paints, Silicone Sealants, Self Adhesive Tapes and other allied products in UAE under the brand name of "ASMACO". Since its establishment in 1995, Anchor Allied has steadily grown from a team of a handful few to a good number of 350+ employees, who work under various capacities in different cities across the world. The promoters of Anchor Allied Factory LLC have more than 40 years of rich experience in the field of adhesives and adhesive products.

The company has established its presence in the Middle East, Far East, South East Asia, Africa, the CIS countries, Latin & South America and Europe by entering into partnerships with the best companies in these regions and this rapid development in transnational cooperation is the epitome of Anchor Allied's growth.

### Problem Statement

The client faced many limitations with their existing systems that affected all their business processes. The limited functionalities offered by their systems were not enough to scale up the enterprise as per the expectations. Lack of transparency in production costing lead to complications in cash flow. Due to this, finance management became difficult and tedious. The client also faced problems with VAT implementation to their services and hence it needed an enhanced finance module to serve all the essential costings needs. The production cycle lacked an organized workflow due to non-availability of real-time inventory data. Inventory control was being done through excel and it led to more complications in production and delivery processes. The absence of a centralized bill of materials mechanism hindered the growth of the enterprise as a whole. The company also needed proper performance management system to monitor and improve the workforce.
